

Call4Future

Co-develop real solutions
for autoimmune diseases

What are we looking for?

We are seeking innovators shaping the future
of autoimmune disease management in:

01 Smart Monitoring

Continuous patient tracking (wearables, apps, IoT)

02 Flare Prediction

AI/ML models to anticipate disease flare-ups

03 Clinical Insights

Decision support systems & data integration

04 Steroid Control

Reducing steroid burden and improving adherence

05 Hybrid Solutions

Combining biology, digital, and clinical pathways

**A working prototype is not required. A clear vision
and a concrete application logic is needed.*

What is the Call4Future?

Is part of the IDEA Hub ecosystem
by Argenx Italy, designed to move
beyond traditional innovation calls.

Selected teams will have the
opportunity to:

Co-develop a PoC with
global pharma partner.

Access to real-world
clinical settings.

Collaborate with
clinicians, researchers,
and tech experts.

Validate solutions
in non-simulated
environments

Accelerate go-to-market
with clinical validation.

Deadline: May 31, 2026
